MSKTD & Associates

Healthcare Group

Kosciusko Community Hospital's CEO, Michael L. Mullins stated "Kosciusko Community Hospital continually updates facilities and technology to improve local healthcare services. The well-designed Emergency Care Center (ECC) provides new efficiencies to better serve our patients here at home. Our patients, medical staff, and employees note increased satisfaction."

The new 12,400 sq. ft. ECC is more than three times larger than the previous emergency area. The ECC is designed to accommodate increased patient volumes with efficiency and the highest standards of patient care. It features private registration, triage, 20 private patient-care rooms, centralized nurse's station, expanded waiting room, and state-of-the-art decontamination and isolation areas.

The interior finishes are warm and inviting, providing an excellent atmosphere for healthcare providers and patients.

MSKTD & Associates, Inc. is proud to have provided master planning, architectural, interior design and engineering services at Kosciusko Community Hospital. If MSKTD can assist you with your next healthcare project, please give us a call. In Indianapolis call 317.917.1190 and ask for Chuck Braden or Brent Crum. In Fort Wayne, speak with Jim Kratzat at 260.432.9337.
