Located along a major pedestrian axis, the 75,000 s.f. Library's copper roofs, brick walls and tinted glass harmonize with the existing campus buildings. The main entrance, with its Indiana limestone-clad reading room cantilevered above the entrance vestibule and marked by a copper clad cylinder lighting the entry rotunda, sets this design apart from the norm. The student lounge/coffee area and computer classroom make the building extremely inviting as a student destination.

Built into the hillside, the four-story building's main floor and entrance are at mid-level. Here the dramatic top-lit entrance rotunda and adjacent monumental stair provide focus for the whole building.

Fully integrated into the building systems, robust high tech infrastructure supports all the technology required for study, research, information storage, collection access and retrieval. These activities are complemented by the colorful and light-filled interior spaces that have wonderful vistas to the surrounding campus and countryside.

MSKTD is honored to have been the Architect of Record for this facility. To learn more about how MSKTD can assist you with your next project, please call our Academic Group. You may reach Gary Voirol in Fort Wayne at 260.432.9337; or Brent Crum in our Indianapolis office at 317.917.1190.
