

## ***MSKTD Receives Design Award for Manchester College Union Project***

**FORT WAYNE & INDIANAPOLIS, IN: MSKTD & Associates, Inc.**, Architects Engineers Interiors, received an “Outstanding Design – Renovation/Modernization” Award from *American School & University* magazine for their design of the **Manchester College Union Addition & Renovation**, North Manchester, Indiana, and is profiled in its November 2008 Architectural Portfolio issue, showcasing the best in school design.

The Union project was a total renovation of the original 1963 building and included 25,000 square feet of new floor area. The most prominent feature of the renovation is the curved glass wall of the Haist Commons, a dining room and meeting/gathering space for students and faculty. Large open areas, balcony overlooks and extensive use of exterior and interior glass walls create bright inviting spaces and connect the activity areas visually with each other and provide views of the campus.
